### The Cupcake Boutique Stuttgart

After the opening of the first Cupcake Boutique in Weinstadt-Beutelsbach in December 2009, the new branch opened its doors in Stuttgart on June 2010. Upon entrance to the boutique, the main components of the boutique concept are immediately visible. A large glass display cabinet next to the checkout area contains the main offerings of the café: a wide assortment of cupcakes. The seating areas in the boutique are oriented towards the front display window. For customers who don't have much time, a bar is available in the center of the shop. The cupcake theme is reflected in small details throughout the store, such as in the wall graphics and the lights.

### Residence AM

This villa is positioned in an area of Stuttgart that offers the best views across the city. The house has a generous living space and the fantastic view can be enjoyed from all three floors. The villa was completely gutted and newly renovated and the façade facing the city was opened out. The open plan layout provides lots of room for flexibility and the use of coordinated materials permit flowing transitions between the individual living areas. A deliberately clear and formal language, both inside and outside, underlines the generous size and openness of the house. The façade and open plan areas with visual orientation create a modern property with a Mediterranean feel.
