House-made coffee blends

Solid wood and high quality decorative elements express the company's core values.

In the heart of Stuttgart DIA – Dittel Architekten have designed the city's first Pano Brot & Kaffee subsidiary. The café invites customers to enjoy handmade organic and locally sourced products in a comfortable and friendly atmosphere. Visitors to the café experience a harmonious, warm environment. The 225-square-meter room sports an unusual ceiling element that unfolds from the entrance towards the rear of the café. The use of high-quality materials, such as oak wood, hand-sewn real leather and Italian tiles, reflect the company's values: tradition, honesty and quality, making the Pano brand tangible.

A comfortable atmosphere makes the customers feel at home.

The product range consists of regional, organic and handmade products, thus expressing a sustainable and responsible approach.
